PRESIDENT WOULD VETO

Exclusion Law Extension - Japanese Boycott Would Be Serious-Resignation of Naval Cadet Due to

Failure in Studies.

Washington, D. C., Oct. 26,-The administration is taking notice of the anti-American agitation in Japan and will do all it can to convince the Japaness that there is the friendliest feeling on one part of the United States toward It is guaranteed to give satisfaction or the Japanese government and its people. Investigation reveals that a series of incidents is responsible for the some. Albert Ross of Readsboro killed a small ers mentioned. The suits have been the United States is unfriendly. The killing of the Japanese fisherman caught booking in Behring sea was the first of these incidents. Recently the city of San Francisco devided to compel the Japanese children to attend separate schools, and following that, information went to Japan that the Pucific coast states were moving to secure legislation to prevent Japanese immigrants from coming into this country. And then came the resignation of Asahi Kitigaki, a midshipman at the United States

naval academy at Annapolis.

It was currently reported at the time the young Japanese left the academy that he had resigned by direction of his government as a protest against the un-just acts of the United States. The administration is now endeavoring to clear up misapprehensions with respect to this secies of incidents. It is said officially that there has been no friction over the killing of the Japanese poscher and that none is anticipated. The action of the school authorities of San Francisco is a matter with which the federal government, of course, has nothing to do. As for the effort to prohibit the immigration of Japanese it can be stated authoritatively that such a movement is not under consideration by the adminstration, and if Congress should epact such a law, of which there is no probability, the President would veto

Now as to the Japanese student at nnapolis/ It is officially said at the navy department that the young man left the naval academy because he had failed in his studies. The notice that he had failed came to the department in the regular way through a report by Admiral Sands. The navy department turned the report over to the state department, which notified the Japanese minster that the young man was deficient in his rating. The ambassador expressed regret and said he would request the midshipman to resign, which he did. In his communication, the Japanese ambassador thanked department for the cons ideration it had shown Asahi Kitigaki. The navy

Something will be done soon to show the attitude of the governmen, and it is understood that the extent to which the administration deprecates the attempt to discriminates against Japanese residing in America will be made clear. The administration, however, finds itself almost powerless to prevent mis-

In this article the author, whose name for obvious reasons we are not at liberty to disclose, drops for once the mask which she in common with other "Bachelor Maids," is accustomed to turn to the world.

Though no longer young, she frankly says she longs for the companionship of a husband and the care of children. The circumstances which have kept from her the happiness which these blessings bring are stated with the same directness which characterizes the whole article. It is the life-story of a "successful" woman, a drama of real life in which the last act is a tragedy.
